

structure has never been altered and it is open to public use. King post truss; 48 feet long.

Warren/Lincoln Gap

44.111185°N 72.857037°W

Off Route 100 over the Mad River. Queen post design. Built in 1880/renovated in 2000. A unique oddity with this bridge is the fact that the eastern portal extends further over the approaching roadway than the western, according to a sign posted in the bridge. The trusses on this bridge are covered not only on the outside, but on the inside as well.

Covered Bridges of Vermont

Washington County:

Robbin's Nest – Barre

44.178703°N 72.470833°W

Off U.S. 302, East Barre, VT, 05649

Robbins Nest Bridge, built in 1965, replaces the earlier 1864 bridge that was lost to the flood of 1927. It crosses the Jail Branch. It is queen post truss construction; 48 feet long. This bridge is on private property.

A.M. Foster - Cabot

44.423546°N 72.268453°W

Located **on private property**, built in 1988, this bridge sits over a pond in the middle of a field, on Cabot Plains Road.

Kent's Corner – Calais

44.367867°N 72.484287°W

VT-14 north to E. Calais, west on Moscow Woods Rd to N. Calais Rd. to Kent's Corner, turn back about 100 yards to bridge on left. King Post truss construction. **Privately built** in 1963; **located on private land.**

Coburn – East Montpelier

44.280848°N 72.454198°W

Coburn Road, East Montpelier, VT, 05651

NW off Route 2. This bridge, built in 1851/renovated in 1970, crosses the Winooski River (formerly known as the Onion River). The trusses and structure are intact; the original deck has been replaced. Queen post trusses; 70 feet long.

Martin/Orton Farm

44.287567°N 72.40818°W

Off U.S. 2 Plainfield, VT 05650. The Martin Bridge, built in 1890, crosses the Winooski River. This bridge has Queen post truss construction and is 45 feet long. The bridge is on **private property; traffic on the bridge is prohibited.**

Stony Brook/Moseley - Northfield

44.120409°N 72.689189°W

Stony Brook Road, Northfield, VT, 05663
Built in 1899. Located W. off Route 12A on Stony Brook Road. Travel 1.6 miles from the junction of Route 12 and Route 12A, then turn right on Stony Brook Road and travel 0.2 miles. Take a left, bridge is 0.7 miles.

Slaughter House – Northfield Falls

44.168569°N 72.65457°W

Slaughter House Road, Northfield, VT, 05664
Off Route 12 on Slaughter House Road, formerly Bailey Street. The turnoff is 0.3 miles south of the main intersection in Northfield Falls, then 0.1 miles down Slaughter House Road to the bridge. The Slaughter House Bridge, built about 1872, carries Slaughter House Road over the Dog River. Slaughter House Road was formerly named Bailey Road. Queen post truss; 55 feet long. A small parking area is available on the left side of Slaughter House Road before crossing the bridge.

(Cross) Station/First Cox Brook/Northfield Falls – Northfield Falls

44.172491°N 72.651469°W

Cox Brook Road, Northfield Falls, VT, 05664
W. off Route 12 on Cox Brook Road. The turnoff is to the west, at the main intersection in Northfield Falls, then 0.1 miles down Cox Brook Road to the bridge. Cross Station Bridge was built about 1872 and carries Cox Brook Road over the Dog River. This is the only location where one covered bridge in Vermont can be seen from another; from Station Bridge you can see Lower Bridge, which is just down the road.

Northfield Falls. Town lattice truss; 138 feet long.

Lower/Newell/Second Cox Brook – Northfield Falls

44.172788°N 72.653039°W

Cox Brook Road, Northfield Falls, VT, 05664
This bridge, built about 1872, is known as the Newell, Lower or Second Bridge. Queen post truss; 55 feet long. This bridge is visible from Station Bridge.

Upper/Third Cox Brook – Northfield Falls

44.173809°N 72.655565°W

Cox Brook Road, Northfield Falls, VT, 05664
Built in 1872/renovated in 1966. Queen post truss design, it is 51.5ft in length, and resting on abutments either faced or rebuilt in concrete. The trusses are set at an offset, skewed to form a parallelogram.

Village/Great Eddy – Waitsfield

44.189497°N 72.823608°W

E. of Route 100 on Bridge Street.
This bridge, built in 1833/restored in 1975/renovated 2000, is the oldest operating covered bridge in the state. It carries Bridge Street across the Mad River. The basic structure remains intact, but much of the flooring and braces have been replaced. A pedestrian walkway, an original component that had been removed, was rebuilt. The bridge has the longest clear span of any Burr truss bridge in Vermont. Multi-kingpost and Burr arch; 105 feet long.

Pine Brook Bridge - Waitsfield

44.205639°N 72.792132°W

E. off Route 100. From Village Bridge travel east on Bridge Street to Waitsfield Commons. Take a left on North Road; 1.2 miles to the bridge. The Pine Brook Bridge, built in 1872/renovated 1974, carries North Road over Pine Brook just outside Waitsfield. Its
